What is AMORE about?

The goals of this project are to build awareness and to empower adult people to start recognizing everyday sexism and to prevent it. Participants will gain information, abilities and tools to notice everyday sexist situations and they are going to learn how to change them.

The AMORE partnership is also focused on the inclusion of adult people from the LGBTIQ+ communities and immigrant backgrounds pursuing real conditions of equality, with a special emphasis on combating everyday sexism in the media.

What is new?

Research about MicrOmachismes, every day sexist practices in adult women, LGTBIQ + community and migrant women in various social media has been translated to all the partners languages; Hungarian, Spanish, Italian and Finish.

We are very pleased to present it here

The image shows four posters for the AMORE project, each in a different language. The central poster is in English and features the AMORE logo at the top. Below the logo, it reads "MicrOmachismo Adultos" and "2020-1-HU01-KA204-078666". The main title is "ReEducación". Below this, it says "INVESTIGACIÓN: MicrOmachismo, prácticas sexistas cotidianas en mujeres adultas, comunidad LGTBIQ + y mujeres migrantes en diversos medios sociales." and "(Hungria-Italia-España-Finlandia)". At the bottom, there is a small disclaimer: "El apoyo de la Comisión Europea a la elaboración de esta publicación no constituye una aprobación de su contenido, que refleja únicamente la opinión de los autores, y la Comisión no se hace responsable del uso que pueda hacerse de la información contenida en ella." Logos for the European Union and other partners are at the bottom.

The other three posters are in Hungarian, Finnish, and Italian, each with the same layout and content as the English poster, translated into the respective language.

The training course for adult trainers and adults from the different entities has been completed in Spain.

We all are regularly exposed to everyday sexism without being aware of it. We are extremely used to these situations or set phrases that are simply seen as social constructs that we usually acknowledge as being normal. The headlines in the media are often condemning the crimes that end up with a dead body. Nevertheless, they do not analyse the base of this phenomena, established over a society that see everyday sexism as "normal".

What is next?

A workshop will be held in each partner organisation after the course in Spain. The objective is to share the experience and knowledge acquired in the visits with the personnel of the entities, adult learners, collaborating organizations and interested persons. The workshop will be organized and taught by the people who have participated in the training activities.
