ABOUT THE HOSTING ENTITY

WHERE WE COME FROM:

Permacultura Cantabria was founded in 2005. It was born as an ecological farm where we carried out social and ecological projects based on permaculture principles. However, we grew and the facilities became too small to support our activities. Therefore, in 2018 we decided to move to a larger area.

[A video of our beginning](#)

WHERE ARE WE NOW:

Currently we have left this farm to start a new stage and create a reference project at European level. Though, adapting facilities to permaculture design takes its time so we are in a 5 years transition period, from 2018 to 2023.

Nowadays, we develop our activities in Penagos and although the facilities are not designed through permaculture now, we are close to Cabárceno Natural Park (participants can visit it in their free time) and we'll try to visit other sustainable initiatives developed in our rural area.

WHERE WE WILL BE:

In 2026, we will move to another area with more than 6ha where we will place new and **larger facilities based on the principles of permaculture**. These new facilities, aim to be an international reference project of permaculture and ecology.
